Update on River Mile 10.9 Project

The Lower Passaic River Study Area Cooperating Parties Group (CPG), under the supervision of the U.S. Environmental Protection Agency (EPA), is currently in the process of dredging approximately 20,000 cubic yards of material from RM 10.9 in Lyndhurst.

We wanted to inform you that the shutdown of the Federal Government is not expected to impact this project. The government personnel necessary to continue oversight of the project are not affected by the shutdown, so we expect work to continue as planned.
